Intro

Thank you for choosing the Angel of Doom Fuzz pedal from Vein-Tap.com! We're sure it's about to become your go-to fuzz. It's a fantastic, crazy beast with pure, old-school analogue IC tone circuitry which can help you create sinfully good sounds.

This manual will describe the Angel of Doom's controls and options. Read thoroughly and soon you will master the Angel of Doom's potential.

Thanks again for choosing the Angel of Doom Fuzz pedal from Vein-Tap.com, and remember that if you need any help, email me at info@vein-tap.com and I'll be glad to offer advice.

All the best!

Ben

Pedal Diagram

1. Power Jack – plug a standard, centre negative 9v power supply here. Most standard power supplies will work here: if it'll power a Boss pedal, it'll power the Angel of Doom.

2. Input – plug your guitar, or the previous effects pedal in your chain, in here.
3. Output – plug your amp, or the next pedal in your chain, in here.
4. Bypass Footswitch – turn the effect on and off with this soft touch footswitch.
5. LED – this LED will light when the effect is engaged.
6. Fuzz Control – this controls the amount of fuzz which is added to your signal, from not much (0) to lots (11).
7. Volume Control – controls how loud the Angel of Doom is when engaged. Goes from silent (0) to stupidly loud (11).
8. Tone Bypass Switch – use this switch to bypass the tone filtering section of the Angel of Doom. Switch this off for a trademark scooped mid sound, and to bring the Tone control into play. Switch it on for unfiltered, full mid tones, disabling the tone control.
9. Tone Control – controls how dark / bright the sound of the Angel of Doom is. Goes from full bass (0) to full treble (11).

10. Limit Control – use this control to limit the signal going into the Angel of Doom. Useful as an effect in itself, or to limit hot pickups which can overload the pedal. Goes from unlimited (0) to fully limited (11).

Outro

And it's as simple as that! I hope you'll love your Angel of Doom Fuzz pedal as much as I love my own, and that it soon becomes an essential part of your pedalboard. Remember that your Angel of Doom Fuzz pedal enjoys a lifetime guarantee, so if ever you have any problems, get in touch with me at info@vein-tap.com and I'll put any problems right or answer any questions you may have.

Enjoy your new pedal, and thanks again for choosing Vein-Tap.com!

All the best,

Ben
